The growing global tourism industry offers incredible growth opportunities – particularly in sustainable and animal-friendly tourism. Tourists love seeing animals in their natural habitats, but local tourism operators also need to protect the animals and environments they rely on. This hands-on, industry-oriented program trains future tourism leaders with the skills to maintain and enhance environmental integrity alongside industry growth.

- Learn how to assess the sustainability-related impacts of tourism, and how this links with animal conservation, biodiversity and animal behaviour
- Learn how animals are impacted by the environment and human interaction, and what we can do to protect their future
- Develop your analytical, management and research skills to better understand how to conserve animals and the environment, and how to engage with stakeholders in the scientific, public and business sectors
- Apply your growing knowledge and skills through fieldwork in locations such as Fraser Island and Stradbroke Island, and through industry projects designed to develop a solid foundation for your chosen career

Career opportunities
Ecotourism manager, ecotourism guide, wildlife manager, environmental educator, environmental consultant, environmental manager, policy officer, communications officer, researcher, museum curator

Membership

Scholarships
Scholarships can give you money and other financial support to help you while you study. Find out more at usc.edu.au/scholarships.
